

NEW!

The Revolutionary Elastic Pallet Wrap

Flex-Net[®]

*Wider
Longer
Stronger
Better*

FlexNet® X-SPAN® — the new improved stretch net with 50% elongation Keeps its original width, enlarges wrapping surface and saves you time!

Flex-Net® X-SPAN® leads the way in both agricultural and industrial settings due to its aggressive memory. The new X-SPAN Technology is a real revolution in the pallet net world, since the net stretches further without losing width.

NEW

Flex-Net® X-SPAN® is highly elastic and stretches at least 50% for more yield per roll.

Flex-Net® X-SPAN® before stretching

Flex-Net® X-SPAN® stretched to 50%

The 3rd dimension of stability.

NEW

All known features of the Flex-Net are now in the new line of X-SPAN® products:

Flex-Net® X-SPAN® requires far less machine tension than ordinary, non-stretch netting, while still maintaining its superior load security.

Flex-Net® X-SPAN® when wrapped over the top of the load, supplies the 3rd dimension of stability.

Due to its unique Built-in Memory, Flex-Net® X-SPAN® enables the load to be wrapped with little or no overlap (0-10%) — which means money savings over other less efficient wrapping methods.

NEW

Flex-Net® X-SPAN® keeps its width when stretched as much as 50%, allowing faster cycle and more economical wrap, saving time and money.

When wrapping irregularly shaped or incomplete loads, the elasticity of the Flex-Net® X-SPAN® will hold the load firmly, gripping every curve and covering every gap.

Flex-Net® is uniquely suited to hand application, eliminating the need for physical strength to achieve the required tension. The net's elasticity makes it as easy to apply as stretch film, making it a very convenient, economical and effective way to wrap any load in any conditions.

Flex-Net® X-SPAN® is highly compressible and easy to dispose of. Net removed from the pallet will take up less than one third of the space of waste removed from a pallet wrapped by other methods, and it will weigh much less.

**FlexNet® X-SPAN® is used where air flow is essential.
The best solution is now made Better!**

Some applications:

- Fresh products such as fruits and vegetables
- Food products that are hot or warm filled, canned food, pet food
- Beverages, hot or cold
- The dairy industry
- The meat industry, fresh or frozen
- The fish industry, fresh or frozen
- Construction materials, bricks, blocks, fire wood
- Chemicals, Salt, bags of warm products
- And more...

FlexNet® X-SPAN® is manufactured by a world leading company, **Tama Plastic Industry**, in state of the art production facilities under strict quality control and under the ISO 9001 2008 certification.
